

Manager, Innovation Lab, AI

Job ID

REQ-10065812

Mar 10, 2026

LOC_IE

About the Role

Key Responsibilities

- Lead the design and delivery of MarTech AI/GenAI projects, and other AI-driven innovations under within the iLab's AI vertical (GenAI, agentic solutions)
- Translate AI concepts into actionable prototypes, driving innovation from idea to implementation
- Manage execution of AI proof-of-concepts and MVPs, mitigating risks and aligning with stakeholders
- Collaborate with cross-functional teams and external partners to define use cases and deliver solutions
- Contribute to project roadmaps, progress reports, and performance tracking for leadership visibility
- Contribute to hypotheses definition for experimentation and defined parameters for validating hypotheses, key performance indicators (KPIs) and metrics to measure success, track performance against targets, and identify areas for improvement.
- Promote continuous improvement and best practices in program management and innovation workflows

Essential Requirements

- Bachelor's degree in business, Computer Science, Data Science, or a related field
- 3–5+ years of experience in AI and innovation management, including work with large tech companies
- Proven expertise in AI technologies, including large language models and natural language processing
- Strong background in product management, marketing technology, strategy, or consulting
- Demonstrated ability to design, prototype, and deliver high volume AI solutions that meet compliance standards
- Excellent communication skills to bridge technical and business teams and drive implementation

Commitment to Inclusion

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.
