About the Role

Major accountabilities:

- Lead and support site validation planning by authoring and maintaining validation master plans for processes, cleaning, and packaging, including ongoing verification.
- Ensure a robust validation lifecycle by maintaining a state of control through Ongoing Process Verification (OPV) and identifying critical variables for routine monitoring and quality risk management.
- Author, review, and approve validation and verification protocols and reports (process, cleaning, and packaging).
- Support and oversee execution of validation activities on the shop floor.
- Review Master Batch Records and related change controls, assessing revalidation requirements based on technical changes.
- Conduct and support pre-validation risk assessments, providing technical expertise and applying risk management tools in a cross-functional environment.
- Manage validation deviations, define corrective and preventive actions, and ensure inspection readiness in compliance with cGMP and Novartis standards.

Minimum Requirements:

- Bachelor's degree (BSc) in Chemistry, Pharmacy, Chemical Engineering, Pharmaceutical Technology, or related field.
- 2–3 years of experience in pharmaceutical manufacturing, MS&T, technical development, or quality.
- Good understanding of manufacturing processes, process equipment, and GMP quality systems.
- Experience with process validation and writing/reviewing technical reports.
- Fluent in English and proficient in the local site language.
