About the Role

Key Responsibilities

- Own end-to-end supply planning for an assigned product portfolio.
- Balance demand, supply, and inventory to meet service, inventory, and forecast accuracy targets.
- Monitor supply plans and adjust for changes in demand, constraints, or business priorities.
- Collaborate with manufacturing sites and supply chain partners to ensure plan execution.
- Identify supply risks early and develop practical mitigation actions.
- Track and report performance against service level, inventory, and planning key performance indicators.
- Optimize inventory levels to reduce excess stock and potential write-offs. Support Sales and Business Planning processes with high-quality, timely inputs.
- Drive continuous improvement through better planning processes, tools, and automation.
- Escalate critical supply risks and ensure an action plan with an owner and due date, complying with policies and GxP quality requirements where applicable.

Essential Requirements

- Bachelor's degree in supply chain management, engineering, business, or a related field.
- Two to five years of experience in supply chain planning and/or analytics roles.
- Strong understanding of end-to-end supply chain planning processes.
- Experience in supply planning, demand and supply alignment, and inventory management.
- Knowledge of Sales and Business Planning processes and cross-functional planning environments.
- Strong analytical and problem-solving skills, with the ability to interpret large data sets.
- Intermediate or advanced English level proficiencies

Desirable Requirements

- Experience in Regulated Business, process or environments.
