About the Role

Key Responsibilities:

- Lead product life-cycle management to ensure robust, high-quality, and on-time supply across the value chain.
- Act as the single point of contact for the product, including issue resolution and crisis management.
- Execute long-term demand, capacity, and inventory planning to optimize service, cost, and supply reliability.
- Lead cross-functional product teams across Operations, Development, and Commercial functions.
- Define and execute integrated manufacturing strategies, including launches, transfers, and process improvements.
- Partner with manufacturing sites to ensure optimal site allocation and supply network performance.
- Drive cost leadership initiatives focused on efficiency gains, complexity reduction, and network optimization.
- Ensure compliance with quality, good manufacturing practice, and regulatory requirements while improving processes.

Essential Requirements:

- Master's degree in business, economics, engineering, science, medicine, or a related technical discipline.
- Minimum five years of professional experience, including relevant experience in the pharmaceutical industry.
- PM certification (APICS CPIM or APICS CSCP).
- Proven experience leading complex, cross-functional initiatives in regional or global matrix organizations.
- Strong background in supply chain, strategy, and financial management across the product life cycle.
- Demonstrated leadership ability in complex, multicultural, and changing environments.
- Fluent written and spoken English.

Desirable Requirements:

- Additional language skills beyond English.
- Association for Supply Chain Management certification: Certified in Production and Inventory Management or Certified Supply Chain Professional.
