

Clinical Data Analytics Lead

Job ID

REQ-10078036

Jun 11, 2026

LOC_IN

About the Role

Key Responsibilities

- Support DM Leads and Data Quality Teams (DQT) in deriving and articulating both planned and ad-hoc clinical and operational data insights.
- Drive cross-functional collaboration to enhance data strategy, quality, site experience, and patient safety using disease area, protocol, and data standards expertise.
- Partner with Central Monitoring (CM) and Risk-based Quality Management (RbQM) leads to promote risk-based data review approaches.
- Act as a data review solution advisor, translating complex insights into clear, actionable recommendations for stakeholders.
- Contribute to exploratory data quality management plans in collaboration with DQT.
- Enable detection of data discrepancies and anomalies by supporting deployment of user-friendly analytical tools.
- Promote responsible AI adoption, develop proof-of-concepts (PoCs), and support product ionization of approved use cases.
- Identify opportunities to optimize analytics processes and improve solution performance.
- Stay current with emerging technologies, trends, and best practices in data analytics, automation, and AI.
- Develop and maintain technical documentation while fostering a culture of innovation and continuous learning.

Minimum Requirements

- Strong experience in clinical data management with expertise in RbQM, analytics, and driving operational excellence in pharma/clinical research.
- Proficiency in clinical data technologies (EDC, data hubs, metadata tools), standards (CDISC SDTM/ADaM), and regulatory/data governance frameworks.
- Exposure to AI/ML, automation, cloud, BI tools (Power BI, Tableau), and programming (SAS, R, Python) with strong ability to translate complex insights into clear stakeholder communication.

Role Requirements

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives.
