

# Production Support Engineer

Job ID

REQ-10079426

Jun 02, 2026

LOC\_NL

## About the Role

### Key Responsibilities

- Perform preventive and corrective maintenance to support reliable operation of production equipment.
- Troubleshoot equipment failures and implement timely, effective technical solutions.
- Execute inspection and calibration activities in line with defined protocols and standards.
- Collaborate with manufacturing and quality teams to resolve technical challenges and align priorities.
- Manage spare parts administration in coordination with maintenance and reliability engineering.
- Contribute to continuous improvement through input on equipment and process enhancements.
- Develop technical documentation and support training for production operators where needed.

### Essential Requirements

- Degree in Engineering or a related field with relevant maintenance experience.
- Proven experience in maintenance and facility engineering within a production environment.
- Experience working in a regulated environment such as Good Manufacturing Practice.
- Strong technical skills in troubleshooting, root cause analysis, and equipment maintenance.
- Fluent in English, both written and spoken.

### Commitment to Diversity and Inclusion

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

## Role Requirements

**Why Novartis:** Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

**Benefits and Rewards:** Learn about all the ways we'll help you thrive personally and professionally.
