About the Role

Major Accountabilities

- Support implementation and workflow integration of core RWD platforms that are either internal or external to Novartis
- Conduct user acceptance testing and quality checks for new platform features or tooling deployments
- Support evaluation of NLP tools from a technical integration and workflow feasibility perspective
- Identify workflow inefficiencies and design automation or tooling solutions that accelerate steady execution
- Partner with the RWD landscape and vendor evaluation analyst to ensure data source access is operationalized within platform environments
- Develop training materials and best practice guides for NOCC Hyderabad team members on platform and tooling usage
- Monitor platform performance, flag issues, and coordinate resolution with other team members
- Spans multiple platforms simultaneously and emerging AI tools, each at different stages of implementation maturity
- Works across technical and scientific dimensions- requiring fluency in both
- Operates with significant autonomy on technical implementation tasks; expected to exercise independent judgment on workflow design and tooling evaluation . Partners with U.S. data platforms team

Essential Requirements

- Experience with data integration, ETL processes, or clinical/claims data pipelines
- Demonstrated ability to produce clear technical documentation and workflow guides
- Strong problem-solving orientation with ability to work across technical and non-technical teams
- Experience with pharmaceutical or life sciences data platforms are similar enterprise health data environments
- Experience with data from electronic medical records, registry databases, and external insurance claims databases for health outcomes research. Additional experience in epidemiology, market research, or clinical research is a plus.
- Experience in creating, reviewing, and maintaining codelists aligned with ICD-9, ICD-10, NDC, HCPCS, LOINC coding conventions for healthcare and real-world data projects
- Understanding of organizational processes, including experience working cross-functionally with key internal stakeholders.
- A strong interest in working in pharma.
- Open to experimentation and taking smart risks to support creative thinking that leads to practical solutions to healthcare and business challenges.

Desirable Requirement:

- Holds a high standard on quality excellence. Continuously seeking to enhancing standards, technology through expansion of knowledge and training.
- High ethical values and standards.
- Able to speak up, challenge conventional thinking, and stand up for ideas.
- Confident and competent when interacting with internal stakeholders.
- Strong written/verbal communication skills. Highly effective at summarizing and presenting key considerations and evidence.
- Strong team spirit.
