

Preclinical Data Manager – (Senior Scientist)

Job ID

REQ-10080096

Jun 11, 2026

LOC_IN

About the Role

Key Accountabilities:

- Evaluate quality and accuracy of non-clinical data received from internal studies and external partners and liaise the same to resolve discrepancies with corrective actions, where needed.
- Align Preclinical Safety data requirements with protocols, reports, etc. in close collaboration with Study Directors/Leads/ Subject-Matter Experts to ensure complete and meaningful transfer of data.
- Involve in developing global processes/guidelines for data management and quality control.
- Coordinate with relevant teams to ensure timely delivery of CDISC-SEND compliant study data from external test sites and contributing scientists to the Novartis Study Data Warehouse.
- Partner with different Preclinical Safety line functions to define the purpose, need and precise details to be included for data collection and documentation of data as per the internal/ external quality compliance requirements.
- Drive strategy of including new data types or sources, e.g., genomics, transcriptomics, immunophenotyping in the Novartis Study Data Warehouse, according to emerging needs from Preclinical Safety and Regulatory requirements.
- Represent Novartis on industry wide teams to impact/ influence regulatory policies
- Coordinate with Preclinical Safety management and operations to define goals, objectives and Key Performance Indicators to include in contracts/expectation documents with external partners

Minimum Requirements:

- Experience working with large data sets especially from the pharmaceutical industry for example (clinical pathology, in-life findings, toxicokinetic, pathology, genomics, etc.)
- Experience using LIS, particularly Pristima or Provantis.
- Competence with Business Intelligence data visualization tools (ex: Spotfire, GraphPad, Qlik) Scripting experience (Python, R) is a plus
- Graduate/ Postgraduate in Life Sciences/ Computer Science/ Computer applications with 3-5 years relevant experience in preclinical data management.

Role Requirements
