Job ID

REQ-10080151

Aug 03, 2026

LOC_IN

About the Role

Key Responsibilities:

- Deliver customer requirements as per agreed SLAs (timeliness, accuracy, quality, etc) and drive excellent customer service
- Monitor Master Data proactively and identify and address Data Quality Issues.
- Drives continuous improvement regarding Master Data Management Processes, Tools and Rules by aligning processes and business requirements.
- Perform resolution activities including manual if needed in the defined MDM system (Reltio/ Informatica/EBX) and other tools and conduct Data Health checks for specific master profile/accounts related issues, such as non-matches, close matches and other exceptions.
- Expertise in Affiliation analysis and building optimized frameworks for transformation
- Proactively identify data challenges and improve data quality.
- Deliver services through structured project management approach with appropriate documentation and communication throughout the delivery of services
- Create & maintain standard operating procedures (SOPs), quality checklists that will enable excellent quality outputs for all outputs within the function
- Maintain Master Data in appropriate systems and ensure consistency of data (Golden Record) in MDM system
- Proactively suggest match-merge rules to improve match candidates and also provide feedback on data quality issues to source system
- Triggers and Executes data management process training including on-site support.
- Supports corrective actions for data maintenance/cleaning.
- Adapts and Improves Master Data Model and Processes with focus on their integrity and consistency.
- Work with cross-functional teams to validate adherence to master data policies and communicate non-adherence where appropriate.
- Support IT & Team project managers in system or data/process change project triggered by IT Business Analysts or system users
- Triggers MDM related system / process / data integrity improvement projects
- Participate in various knowledge sharing sessions that enable growth and improves quality of CSP Hyderabad deliverables across the function
- Comply with all internal functional operating procedures like time tracking, KPI tracking and reporting, and other internal systems and processes
- Collaborate with the Team Lead/Manager and team members to support and ensure the flexible coordination of activities to deliver according to expectations (time and quality).
- Comply to all Novartis operating procedures as per legal / IT / HR requirements defined

Essential Requirements:

- Bachelor's degree in computer sciences / IT or other quantitative sciences
- Minimum 5+ years' experience in a Global company as a data steward, capable of working as individual contributor as well as maintain small team; Experience in working in Pharma / Life Science industry and US healthcare data is strongly preferred.
- Ability to write complex SQL queries.
- MDM Platforms: like Reltio, Informatica MDM, EBX, TIBCO

- ETL tools: Data IKU, Python.
- Data Warehouses: Snowflake, Databrick
- Business understanding of pharmaceutical industry and data standards. Domain experience in at least one of the following areas – a) Pharma R&D, b) Manufacturing, Procurement and Supply Chain and c) Marketing and Sales.
- Should have familiarity with the data and the business processes related to MDM solution; Implemented Data Quality framework for MDM processes
- Exposure of AI tools & use of AI in bringing efficiency to Data Stewardship processes while handling data and the Data Querying procedures
- Understand agile methodology. Hands on with JIRA, confluence etc., would be a preferred skill. Document user stories (JIRA) and refine with development team and ensuring the relevant technical stories are linked to ensure requirement traceability
- Should have strong documentation skills and experience with MS Word, power point, creating process flow etc., with highest standard and quality
- Should have prior experience working with cross functional teams, understanding the R&R and the delegated objectives
