

Manager Data Governance

Job ID

REQ-10084805

Aug 04, 2026

LOC_IN

About the Role

Key Accountabilities:

Strategic Leadership & Governance

- Define and implement enterprise-wide data governance frameworks, quality rules, and validation logic.
- Champion the Shift-Left Strategy by engaging source teams and market data owners early to embed governance and quality practices upstream, reducing rework and accelerating insights.

Operational Excellence

- Strong understanding of metadata & stewardship, DQ, MDM platforms
- Hands on with tools such as Collibra, Ataccama (DQ profiling & automation), or Reltio is a plus.
- Collaborate with data stewards and enterprise data owners to uphold metadata, lineage, and compliance standards.

Innovation & Automation

- Initiate and deliver automation projects to optimize data lifecycle processes and reduce manual overhead.
- Foster innovation to address operational gaps and improve efficiency.

Stakeholder Engagement & Influence

- Act as a trusted advisor to senior stakeholders, promoting data-driven decision-making and co-creation of data products that deliver commercial impact.
- Build strong partnerships across markets, source systems, and governance teams to ensure alignment and adoption.

Essential Requirements:

- Education: Bachelor's or Master's degree computer science, Information Systems, or related field.
- Experience: 6+ years in data governance, data quality, or data management roles. Strong understanding of metadata & stewardship, DQ, MDM platforms. Strong understanding of any data assessment framework and data management maturity models.
- Skills: Strategic thinking and ability to influence senior stakeholders. Excellent communication and collaboration skills across global teams. Strong analytical and problem-solving capabilities.

Maturity & Benchmarking

- Support data maturity assessments to evaluate data management maturity, identify gaps, and track progress against benchmarks.
- Develop and execute improvement plans to strengthen data capabilities across domains.

Key Performance Indicators (KPIs)

- Successful implementation of governance and quality frameworks across BSI.
- Improvement in data maturity scores and reduction in data-related rework.
- Adoption of automation initiatives and measurable efficiency gains.

- Positive stakeholder feedback and increased trust in data for decision-making

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you.
